

DYNA GOLD™

CORN MIX LIQUID FOLIAR SPRAY

PRODUCT INFORMATION

DynaGold Corn Mix is a liquid foliar formulation designed to correct and prevent Zinc and selected deficiencies in corn and other crops. If added to the spray tank first, DynaGold Corn Mix will aid in lowering the water pH. A jar-test to check the compatibilities of new or unfamiliar chemical combinations should be performed prior to mixing and application. The addition of a non-ionic surfactant and /or urea nitrogen will aid in uptake.

DIRECTIONS FOR USE

DynaGold Corn Mix should be applied at weekly intervals starting with the first spray at 1 to 2 quarts per application in enough water to cover. Aerial application: 1-1½ quarts per acre in a minimum of 5 gallons of water.

CROP RECOMMENDATIONS

Corn and other crops requiring high Zinc: Use 1 to 2 quarts per acre in a minimum of 5 gallons of water per application.

GUARANTEED ANALYSIS

Total Sulfur (S)	4.00%
4.00% Combined Sulfur (S)	
Magnesium (Mg)	1.00%
1.00% Water Soluble Magnesium (Mg)
