

DynaBac™

INFORMATION

DynaBac is a Lactobacillus acidophilus culture that is derived from a patented process. The addition of a non-ionic surfactant is essential and recommended for best results in both ground and aerial applications. Although DynaBac is compatible with most foliar products, check untired chemical mixes before crop application.

DIRECTIONS FOR USE

Add 1/2 to 1 pint of **Active 80** or other equivalent non-ionic surfactant to the spray water before other materials are added. Shake DynaBac well before each use and add recommended amounts in enough water for coverage.

Aerial Application Rates: 3 to 10 gallons of water per acre.

Ground Application Rates: 20 to 100 gallons of water per acre.
